UW

“ This is a surprise for me, saw this just by chance. Mr, Runric as he's affectionately known was an electronic knowledge base for me, he always took the time to explain for me when I'm purchasing electronic parts, how an electronic component should perform in the equipment. This seemingly unnecessary bit of information goes a long way in helping me to better understand how my appliances function.  
indeed he was a great help to me and will be missed.  
my deepest condolences to his family and friends. Walk good mi brethren and may your soul finds rest.
